Proudly Made in the USA*

Star Hydraulics Swivel Joints

Key Features

Ports & Passages: Configured for control of fluid transfer based on the needs of your application.

Service Pressures: Engineered to operate in systems up to 7,500 PSI.

Application Resilient: Designed utilizing seals compatible with your fluid and temperature requirements.

Rugged Construction: Carbon steel with epoxy finish for corrosion resistance.

Typical Applications

Heavy Construction

Oil & Gas

Material Handling

Mining & Agriculture

Fluid Transfer for Demanding Systems

Hydraulic swivels are essential for reliable system performance, transferring fluid between stationary and rotating components to prevent hose damage and downtime. Designed and manufactured in the U.S., Star Hydraulics builds every unit to meet your specific needs. The result is high-quality performance and long-lasting dependability.

Star Hydraulics' swivel joints ensure reliable, high-pressure fluid transfer in rotating systems with rugged, corrosion-resistant construction and customizable designs.
