A Marking is Not Enough: The OEM Perspective on DOT Compliance

In heavy truck and trailer manufacturing, a DOT marking is important, but it should not be the only factor OEMs consider when selecting pneumatic fittings.

Because DOT compliance relies on manufacturer self-certification, OEMs need to know who is producing the fitting and whether its claims are backed by documented testing.

Our latest DOT compliance blog explores why verified testing, manufacturer accountability, and trusted sourcing matter when safety, uptime, and brand reputation are on the line.

Read the full article to learn why a DOT marking should start the supplier conversation, not end it.

Team members throughout the Alkon family of companies recently gathered for employee luncheons in recognition of America's 250th anniversary.

The gatherings gave our teams an opportunity to pause, connect, and recognize a historic milestone while celebrating the people who make Alkon what it is. From manufacturing and engineering to customer support, sales, and operations, our employees are the reason customers can count on Alkon for quality, reliability, and trusted performance every day.

As we mark 250 years of American independence, we are grateful for the dedication, teamwork, and

Alkon Sales Summit Brings Team Members Together

Alkon Corporation recently hosted its 2026 Mid-Year Sales Conference, centered on continuous improvement and future priorities.

The discussions reinforced the customer-first approach that guides our work while identifying opportunities to refine how we operate, respond, and grow.

As we look ahead, we remain committed to building on our strengths and moving Alkon forward for the industries we support.

Did You Know? Large Truck Safety Starts with Critical Components

people killed
in crashes involving
large trucks in 2022

In DOT air brake applications, every component matters. A failed air-brake fitting can cause pressure loss and compromise a vehicle's ability to stop safely.

Because a DOT mark is based on manufacturer self-certification, Alkon rigorously tests DuraLink™ DOT fittings to support performance, safety, and confidence in critical mobile applications.

When braking performance is on the line, a mark is not enough.
